- 2 – Legs

ASSEMBLY AND INSTALLATION INSTRUCTIONS

- 1) Slip the floor glides over the ends of the arched uprights.
- 2) Place the two arched uprights on the outside of the legs and attach them together using the button head screws and the Allen wrench.
- 3) Square up the rack and tighten all the screws.
- 4) All of our hammered steel racks are finished with an industrial wax designed to give years of protection to the rack. Cleaning is easily done with a damp cloth. Dry thoroughly after cleaning. If a touch-up is ever needed we recommend a "Pledge" like wax product.

It is important that your rack is assembled correctly. If the unit is assembled or used incorrectly, it could become unstable and collapse, possibly causing injury.
