Energy consumption is a significant component of your company's operating expense. Engineered Products Company (EPCO) offers a wide variety of Fixture Bracket RetroFit Conversion Kits to address the Building Owner's and Facility Manager's various needs for lighting system upgrades.

We convert older T12 or T8 fluorescent lamps using magnetic ballast to strip-type fixtures using T8 LED.

Our low cost Fixture Bracket Kits take into account budget, operating environment, required lumen output, energy saving goals, minimum efficacy requirements for utility rebates, and other parameters to ensure we deliver the optimal lighting system solution.

We offer Fixture Bracket Kits for energy efficient bi-pin T8 LED in two configurations:

- Standard — Fixture Bracket Kits (4-foot and 8-foot lengths)
- Pre-wired — Fixture Bracket Kits (4-foot and 8-foot lengths; includes supply line and luminaire disconnect).

Two Fixture Bracket Kit Types are available for:

- Type B Single-End Powered Bi-Pin T8 LED Lamps
- Type B Double-End Powered Direct-wire Bi-Pin T8 LED Lamps
